SKYLOONG

Wired item：GK68/SK68/AK68 U+B 2mode item：GK68S/SK68S/AK68S

Keyboard layout diagram showing 68 keys.

fn + win 🔒 — fn tips: Unlock/Lock the WIN key, prevent windows start pop-ups in the game.

Z🟦1 X🟦2 C🟦3 — fn tips: fn+space ON/OFF the BT mode, link to USB mode.

Bluetooth condition: Z, X, C one of blue led is flashing, the keyboard is connecting the BT equipment.

fn tips: If you are not sure which mode the keyboard is in now, press fn key and observe what LED is on to confirm

fn/fnx tips:

The default fn function is not so good? Set your own fnx Function
For example,in the win mode:

fn + 7 = F7,	fnx + 7 = ◄◄
fn + 8 = F8,	fnx + 8 = ►ǀ
fn + 9 = F9,	fnx + 9 = ►►
……	

fn function description (Double-click FN to light FN's white LED,FN function is held,click FN again to escape from holding status).

Define mode

Key	Function
Standard mode	Standard mode, all buttons can not be user-defined. User can customize your own personality keyboard by the following 4 modes. On-board mode 1/2/3 is strongly recommended,(Note: In the custom mode, except FN key, other keys can be redefined key values, some of the FN + " x " function can be also modified,except the backlight ,bluetooth and system control. The FN button can not be moved, but user can define your own FNX at any key in the custom mode.
FN + W Onboard mode1 WIN mode	① FN + W, onboard mode layer 1, " W " lights white LED, no need to run and connect the driver. The keyboard works in the custom key functions and user can modify the key functions and macro Settings by the driver and these Settings can be downloaded and saved to the keyboard. The reference setting: WIN mode setting to realize the habitual operation of win users
FN + E Onboard mode2 MAC OS mode	② FN + E, onboard mode layer 2, " E " lights white LED. The reference Setting:keyboard of MAC OS, the "control,option,command" key will be in the original position, user can modify the Settings by the driver, download and save to the keyboard , no need to run and connect the driver when use the Mac's function settings. Press FN + 7& again, back to the standard mode.
Driver mode	Drive mode: Keyboard needs to be run and connected the driver in USB wired mode when realizes key function and light effects , some special function(for example:You may assign a macro of more than 32 bytes to a key in the driver mode while it's unavailable in those onboard mode layer) You must need keep the driver running and the keyboard connect with the driver.
FNX setting Onboard mode3	FNX setting: If you don't like the FN position and FN combination key function, you can set your own FNX position and FN combination key function, some special function keys, or combination keys, or macro keys,these settings of this mode can be called by the FNX key in layer1& layer2, all settings in these mode can be modified and saved to the keyboard.
